# Gligorco Gligorov

## Backend & AI Engineer · Production Pipelines · Full-Stack & Mobile

Skopje, North Macedonia · remote / hybrid / relocation | ggligorov1709@yahoo.com | +389 78 875 888

github.com/GligorcoGligorov | linkedin.com/in/gligorco-gligorov-11b282289 | gligorcogligorov.vercel.app

**3.5 yrs** — sole backend engineer, owning a production platform end to end

**10,000+** — products a day through the AI pipeline I designed and run

**99.5%** — uptime with self-healing recovery and rollback

**20+ hrs** — saved every week, 95% less manual data entry

**8 products** — shipped in 2026 across web, mobile, AI and security

## 01 Summary

Backend engineer who builds systems that hold up in production. For 3.5 years I have been the **sole backend engineer at BrandsGateway**, a B2B luxury fashion marketplace, where I designed and own an **agentic GPT-4 pipeline** that processes 10,000+ untrusted vendor records a day across 15+ integrations, with stuck-job recovery, per-item state isolation, versioned rollback and full observability. In 2026 I shipped, on my own, an open-source **email threat-analysis service in Go and Python**, an AI lead-discovery SaaS, an AI stylist, a social habit app and **two healthcare apps**. I treat cost, security and reliability as features and work AI-native with Claude Code and Cursor while owning every line.

## 02 What I bring

**Production backend**
Node.js, TypeScript, Go, PHP/Laravel, Java Spring Boot. Queues, workers, REST APIs and 15+ third-party integrations (OAuth, API keys, tokens).

**Reliability by design**
Watchdogs, dead-letter queues, idempotent writes, backpressure, versioned rollback. 99.5% uptime; Graylog cut debugging time by 60%.

**Applied AI & LLMs**
GPT-4, Gemini, Groq. Structured output, closed vocabularies, cost caps, fallbacks, and dev/holdout evaluation instead of guesswork.

**Security mindset**
SPF/DKIM/DMARC, hostile-input parsing, SSRF hardening, row-level security, token rotation, data minimisation, fuzz testing.

**Full product ownership**
Next.js, React, React Native/Expo, PostgreSQL, Supabase. From schema and API to UI, CI/CD, analytics and monitoring.

**Healthcare domain**
Remote patient monitoring (vitals, medications, doctor-patient chat) and medication reminders, with RLS so each doctor sees only their patients.

## 03 Experience

### Senior Software Engineer · BrandsGateway

April 2023 – Present · Remote

Sole backend engineer for a B2B luxury fashion e-commerce marketplace serving retailers across Europe.

- **AI content pipeline.** Designed and run an agentic GPT-4 pipeline in Node-RED that writes titles and descriptions for 10,000+ SKUs, with prompt versioning, category-aware classification and automated quality control.
- **Reliability by design.** Built a self-healing watchdog that recovers stuck jobs, per-product keyed state isolation and lock/completion tracking, keeping the platform at 99.5% uptime.
- **Vendor platform.** Architected the B2B platform behind 15+ international vendor integrations, including 8+ vendor APIs with OAuth, API-key and token auth, plus WooCommerce REST integrations for real-time inventory and orders.
- **Automation at scale.** Replaced manual imports with automated sync for 10,000+ products a day, cutting manual data entry by 95%; every feed passes schema-enforced validation with self-healing fallbacks.
- **Safe rollback & observability.** S3-backed version history with SQLite tracking (~2,000 records/s) reverts a bad import in minutes; Graylog across the platform cut debugging time by 60%, with Slack alerts for failures.

`Node.js` `Node-RED` `PHP` `Laravel` `MySQL` `PostgreSQL` `SQLite` `AWS S3` `Graylog` `GPT-4` `WooCommerce`

### Laboratory Teaching Assistant · FINKI, Ss. Cyril and Methodius University

Oct 2023 – Oct 2025

Taught CS lab sessions; mentored students in programming, web development and software engineering.

## 04 Education

**BSc Information Science, Applied IT**
FINKI, UKIM Skopje · 2020 – 2024 · GPA 8.68 / 10

**Certifications**
8x Playmakers Network · 2026 ↗
Vue.js, EESTEC Academy · 2021 ↗

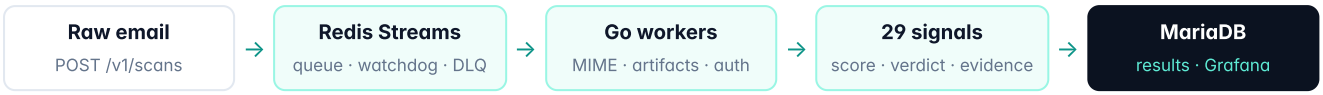

**Languages**
Macedonian (native) · English (professional)

## 05 Featured project

### Inspekt · Email threat-analysis service

2026 · open source · CI green on every commit

github.com/GligorcoGligorov/inspekt · demo, Grafana dashboard, evaluation reports, design notes

- **Fast and resilient.** ~1,000 emails/s with p95 64 ms on a laptop, using Redis Streams consumer groups, a watchdog, dead-letter queue, idempotent writes and backpressure.
- **Detection measured, not assumed.** 6,202 public emails, 80/20 dev/holdout split: holdout phishing recall rose from 20% to 39% at 96% precision, with false positives unchanged at 0.88%.
- **Found by testing.** Load and evaluation runs exposed four real bugs, each fixed with a regression test, including a Redis 7 Lua script that ignored maxmemory.
- **Safe LLM use.** An optional Groq model reviews only borderline mail, can only add points, sees a data-minimised excerpt and runs under a shared cost cap.

`Go` `Python` `Redis Streams` `MariaDB` `Docker Compose` `Prometheus` `Grafana` `GitHub Actions` `Groq`

## 06 Selected products · 2026

**Signal** · AI buyer-intent lead discovery SaaS — Full-stack · AI · SaaS

TypeScript monorepo (Next.js 15, ingestion worker, shared scoring engine) that monitors Hacker News, Bluesky, GitHub and Stack Overflow, scores buying intent with batched Gemini structured output and drafts replies. Cost-bounded with heuristic fallback and per-user LLM caps; SSRF-protected reader, Postgres RLS and 85+ tests.

Next.js 15 · React 19 · Supabase · Gemini · GitHub Actions · Vitest · signal-blond-phi-13.vercel.app

**FitCheck** · multilingual AI wardrobe stylist — Full-stack · AI · live

Two-pass AI design cut inference cost ~10x; a closed vocabulary eliminated hallucinated garment names, verified across 5,673 combinations. GDPR-friendly quotas (IPs kept only as keyed SHA-256 digests); 4x latency fix, 1.1 s → 0.25 s.

Next.js 16 · Prisma 7 · PostgreSQL (Neon) · Vercel AI SDK · Groq · Zod · thefitcheck.vercel.app

**Pact** · social accountability habit app — Mobile · AI · 2-week trial

Expo / React Native app and Next.js API sharing one Zod contract; DST-safe streak logic per pact time zone, pinned by tests; a non-blocking AI photo judge (Groq with Gemini fallback) matching human judgment in 17 of 19 cases.

Expo SDK 55 · React Native · Next.js 15 · Prisma · Supabase · PostHog · Sentry · github.com/GligorcoGligorov/Pact

**VitalLink** · remote patient monitoring. Patient/doctor roles, live vitals, medications and chat; RLS per doctor. GitHub ↗

**MediTrack** · medication reminders. Expo + Supabase with row-level security, secure sessions, push notifications. GitHub ↗

**RentEase** · rental marketplace. Socket.io messaging, PostgreSQL OVERLAPS booking checks, JWT rotation, rate-limited auth. Live ↗ · GitHub ↗

**CodeSensei** · AI interview prep. GPT-4 mentor with progressive hints and a sandboxed Monaco test runner. Live ↗ · GitHub ↗

Earlier: TinexChain (Spring Boot) · BookApp (Spring Boot + React) · ConcertTickets (.NET). All demos: gligorcogligorov.vercel.app

## 07 Skills

| | |
|---|---|
| **Languages** | TypeScript · Go · Python · JavaScript · PHP · Java · C# · SQL |
| **Backend** | Node.js · Express · Laravel · Spring Boot · ASP.NET Core · Redis Streams · Queues & workers · REST |
| **AI & LLM** | Agentic pipelines · GPT-4 / OpenAI · Gemini · Groq · Vercel AI SDK · Structured output · RAG · Evaluation |
| **Data** | PostgreSQL · MySQL / MariaDB · SQLite · SQL Server · Supabase (RLS, Realtime) · Prisma · Neon |
| **Frontend & mobile** | React · Next.js · React Native · Expo · Vue.js · Tailwind CSS · Zustand |
| **Cloud & quality** | AWS (S3, Lambda) · Docker · GitHub Actions · Linux · Prometheus · Grafana · Graylog · Vitest / Jest |
| **Security** | SPF / DKIM / DMARC · MIME parsing · SSRF hardening · Row-level security · JWT rotation |

## 08 Reference & how I work

> *"One of the most capable, reliable and genuinely driven engineers I have had on my team."*

**Trajce (TJ) Kralev**, Fractional CTO, BrandsGateway · trajche@kralev.eu · Read the full letter ↗

Systems thinker: failure modes and scale before the first line. AI-augmented, fully accountable, fast to learn new domains, and comfortable with clients, vendors and cross-team work.
